

All of Concept Seating's chairs and stools feature the following:

- We Give a Sit Warranty covers all components for 6-years.
- Tested per the strictest of industry standards:
 - FNEW 83-269 Test,
 - FIRA Standard 055:2005 Test,
 - ANSI/BIFMA X.511 (bariatrics) and
 - Fire Testing – CA 112 and 133
- 550 lb. weight rating with the 3156 and 3156HR reaching a 800 lb. weight rating.
- Seven-leg base for 20% improved ease of movement and stability over five-leg bases.
- Adjustable lumbar support.
- EAS² Ergo Air Suspension System for ergonomic comfort and added durability

CHAIRS

3120 & 3122 SPLIT HIGH BACK

The 3120 Series is the newest to join Concept Seating's lineup of 24/7 intensive use chairs. It offers numerous adjustment options allowing maximum flexibility for varying body types in a multishift environment. The sleek, modern design is the new concept in rugged style.

3150, 3150HR, 3152 & 3152HR

The HR models include an articulating headrest that can be used as a headrest, neckroll or swung out of the way and is adjustable in height to six positions. If you want a slightly larger seat pan, select that 3152 or 3152 for added comfort.

3142R1 HIGH BACK

The original Concept Seating high back chair. This classic design features heavy-duty ergonomic engineering with ample support and comfort throughout long days.

3156 & 3156HR BARIATRIC

This trailblazing advancement in bariatric seating is engineered from the ground up to handle double the standard weight capacity of the ANSI/BIFMA X.511 bariatric standard (800lb). It's available both with and without a headrest.

STOOLS

3150, 3150HR, 3152 & 3152HR STANDARD STOOL

Need a bird's eye view, with all the same features and durability of the 3150, 3150HR, 3152 and 3152HR? Then this stool is for you. Enjoy a full ring base to support your feet.

3150, 3150HR, 3152 & 3152HR TWO-STEP STOOL

This unique dual-height, adjustable stool provides even more flexibility. The upper level can be used as a footrest when seated, while the lower level is great for stepping up into the chair or even standing on (yes it will support your full weight!).

Concept Seating's line of options and accessories allow users to truly make the chair their own. The added flexibility they provide further ensures that these chairs and stools will serve the unique demands of whatever 24/7 environment they face.

PIVOT ARMS

Pivot armrests are designed for maximum comfort and flexibility. Raise or lower the arms to your preference or easily pivot the armrests forward or backward when not needed. Available for all chair and stool models except the 3156 and 3156HR.

GLIDES

When you need your chair to stay put, choose glides. Our glides are incredibly strong and engineered to match the height of our 60 mm caster, meaning they support all the same height and weight limits. Glides make the chair easy to maneuver when needed but keep it stationary while in use. Available for all chair and stool models.

ELECTROSTATIC DISCHARGE (ESD) BASES

Our ESD bases look like our standard bases and provide all the same benefits, with the addition of preventing electrostatic discharge. This is ideal for control rooms with sensitive equipment. Available for all chair and stool models.

PARTIAL FOOTRING BASE

The Partial Footring Base gives increased versatility for multiple users. It provides a ledge where shorter users can rest their feet, while taller users can simply rotate the base out of the way. The Partial Footring Base is available for all chair models.

3142R1 NECKROLL

Made specifically for the 3142r1 High Back model to provide extra support for monitoring a video wall. Simply slip the neckroll over the top of the chair and adjust it to the desired height. Order one for each user and you have another economical solution to accommodate multiple shifts and fight the sharing of bacteria.

SLIPCOVERS

Our easy on/off slipcovers are made with a breathable, stretchy, athletic fabric that is machine washable. Extend the life of your chair and prevent the sharing of germs between employees when workers each have their own individual slipcovers. Available for the 3142r1 chair and 3150, 3150HR, 3152 and 3152HR chairs and stools.
