

Concept Seating

Maintenance Guide

All Concept Seating chairs and stools are engineered for heavy-duty, 24/7 use. Periodically a few simple tasks each quarter will help maximize the longevity of your chair or stool.

Regular cleaning

All models

Follow Concept Seating's cleaning guide to ensure the proper cleaning of your chair or stool's material. This guide can be found at [ConceptSeating.com](https://www.conceptseating.com).

Tighten bolts

3150 / 3152 / 3150HR / 3152HR / 3120 / 3122

Using a ½" socket, check and tighten, if needed, the four bolts holding the tilt mechanism and the four bolts holding the J-bar.

3142r1

Using a ½" socket, check and tighten, if needed, the four bolts holding the tilt mechanism.

Lumbar bulb

3142r1 / 3150 / 3152 / 3150HR / 3152HR / 3156 / 3156HR

Check that lumbar bulb is securely inserted into the plastic tubing and the silver dial is closed (turning to the left). After the silver dial is closed, the chair's lumbar support may be inflated for individual comfort. To release, simply turn the silver dial to the right and retighten.
